To: Supreme Court,

I'm writing in regards to the unconstitutional effort to change the laws regarding a fair and impartial right to trial of myself and other working class people in regards to asbestos problems incurred at their work places. I'm very much opposed to such an asinine proposal. The crisis here in Michigan being the failure of corporations to take responsibility for their own bad actions, and to be held accountable for them. Taking away the working persons rights to seeking compensation for work related asbestos received at their place of employment is a dislikable proposal indeed. Please do your duty to oust this unconscionable proposal regarding changing this ruling law

Sincerely, Mr. Daniel S. Vezelich:

A retired steelworker:
